## PRESENTATION - WHO WE ARE?

- Responding to the needs of its time, such is the raison d'être of the John Cockerill Group. As the world evolves ever faster, it must also face ever more complex challenges: scarcity of resources, population increase, globalization of the economy...
- At John Cockerill, we have the ambition to combine the expertise resulting from our centuries-old tradition and the technologies born from our spirit of innovation to develop unique technical solutions on a large scale. Solutions that can complement the measures to be taken at the political, educational, economic and societal levels.

## OUR VISION

- We, John Cockerill, are true catalysts of opportunity. We take a different look at the world, at existing and developing technologies, at the needs of our customers and the communities in which we live.

The challenges posed by today's world are so many opportunities for us who are ready to respond to them. Our strength ? Seize these opportunities. Meet these challenges. Provide technical solutions, innovative or existing, but improved. Solutions that all meet the same ambition: to be accessible to as many people as possible.

## OUR TARGET IN GEOTHERMAL

- We John Cockerill Service will be the expert of the MBOP package of EPC geothermal power plant, district heating & cooling, green house, lithium recovering projects. We are also in the possibility of covering the M&O and training of the above project
